BUSINESS & CLIENT
WEBSITES SHIPPED

Software engineer designing and operating production systems across full-stack development, automation and AI. Four years shipping to real clients: ticketing, AI media pipelines, CRMs and multi-store ordering platforms, often as the only engineer on the project.

01 EXPERIENCE

SENIOR FULL-STACK DEVELOPER BEING ADDICTIVE • PUNE

MAY 2024 – PRESENT

- Built and maintain a high-traffic **ticket booking system**: **15,000+ tickets sold over a single 5-day live event**, with server-side booking logic and a cron-based retry system for payment/generation failures.
- Built an internal **AI media orchestration platform** unifying six generation models behind one interface for a 10–15 person team; **cut per-asset turnaround by roughly half** across 1,000+ assets and 50+ client projects.
- Designed and built an internal **Employee Management CRM** with role-based access for ~20 employees, replacing spreadsheet-based HR tracking.
- Inherited and completely revamped **Goldenoak and Unicorn**, two regional ordering and inventory platforms for **100+ Rolls Mania stores** across India, integrated with LimeTray; fixed a critical inventory bug and rebuilt the frontend for both.
- Delivered **7 additional client CRM systems solo**, spanning e-commerce inventory and billing, lead generation, and customer records.
- Developed and maintain **20+ business and client websites** across technology, education, real estate and hospitality sectors.

WEB DEVELOPER ARPHICS • PUNE

JUL 2022 – FEB 2024

- Built an **online admissions system** with backend validation and automated PDF generation.
- Delivered responsive business and school websites using HTML, CSS, JavaScript and PHP.
- Collaborated with multimedia and creative teams to integrate rich visual assets into clean frontend code.
- Optimised web performance, reducing page-load times and troubleshooting complex technical bugs.

02 SELECTED WORK

TICKETADDA

SOLO · END TO END

15,000+ TICKETS · 5-DAY LIVE EVENT

Booking and availability logic stays server-side. A 2-minute cron job finds payments that succeeded but whose ticket failed to generate, retries them, and flips the status so nothing duplicates; an admin override covers the rest. Monitored live during the event.

REACT · NODE.JS · EXPRESS · MONGODB · PAYMENT GATEWAY

AI MEDIA ORCHESTRATION

SOLE BUILDER

~50% FASTER · 1,000+ ASSETS · 50+ PROJECTS

One dashboard over six models (Kling, Veo 3, Nano Banana 2, ElevenLabs, Lyria, Imagen). A FIFO queue keeps requests under provider rate limits, with polling-based failure detection, automatic retries and per-project asset folders.

NEXT.JS · NODE.JS · EXPRESS · PYTHON · REST APIS

ROLLS MANIA PLATFORMS

2026 REVAMP

100+ STORES · GOLDENOK 70+ · UNICORN 30+

Mapped an unfamiliar inherited codebase, then rebuilt the data and identifier logic (a bug could corrupt outlet inventory), the LimeTray integration and the frontend. Orders, wallets, payments and PO generation with admin and outlet-scoped access. Maintained in production.

PHP · MYSQL · CRON JOBS · ROLE-BASED AUTH

BOPS · EMPLOYEE CRM

SOLO

~20 EMPLOYEES · 4 ACCESS TIERS

Attendance and punch-in/out, payroll, leave, project allocation, performance reviews, leads and daily tasks in one role-based system, replacing scattered spreadsheets.

JAVASCRIPT · NODE.JS · EXPRESS · REST APIS

7 CLIENT CRM SYSTEMS

SOLO

E-COMMERCE INVENTORY & BILLING · LEAD GENERATION · CUSTOMER RECORDS

Reel Factory · Sunanda Mangal Kendra · Helios · Realtors India · Jaywant Group · MB Ashtekar Jewellers · Pera CET. Centralised, per-client management replacing spreadsheets and manual website updates.
